4/05/99 LAND DISPOSAL NOTIFICATION AND L Manifest Doc. No.: 19706 Douglas Aircraft Company Generator Name: State Manifest No: 208 19706 Profile Number:

1. Is this waste a non-vestevater or wastovater? (See 40 CFR 268.2) Check ONE: Nonwastawator X Wastowater 2. Identify ALL USEFA hazardous waste codes that apply to this waste shipment, as defined by 40 CFR 261. For each waste code, identify the corresponding subcategory, or check NONE if the waste code has no subcategory. Spent solvent treatment standards are listed on the following page. If F039, multi-source leaenate applies, those constituents must be listed and attached by the generator. If D001-D043 requires treatment of the characteristic and meet 268.48 standards, then the underlying hazardous constituent(8) present in the waste must be listed and attached.

REF	3. US EFA HARARDOUS WASTE	4. Subcategory Enter the subcategory description. If not applicable, simply check none

Haz If To	ardous Constit no UNCs are p	or D001-D041, underlying hazardous constituent(s), use the "F019/Underlying tuent Form" provided (CWM-2004) and check here: retent in the waste upon its initial generation check here: X all USEPA waste code(s) and subcategorie(s), use the supplemental sheet provided (C	3 7 M-2005	-B)		

HOW MUST THE WASTE RE MANAGED? In column 5 above, enter the letter (A, Bl, B3, B4, C, D or E) below that describes how the waste must be managed to comply with the land disposal regulations (49 CFR 268.7). Please understand that if you enterthe letter B1. B3. B4 or D, you are making the appropriate certification as provided below. (States authorized by EPA to manage the LDR program may have regulatory citations different from the 40 CFR citations listed below. Where these regulatory citations differ, your certification will be deemed to refer to those state citations instead of the 40 CFR citations.

RESTRICTED WASTE REQUIRES TREATMENT

This waste must be treated to the applicable treatment standards set forth in 40 CFR 268.40.

For Hazardous Debris. "This hazardous debris is subject to the alternative treatment standards of 40 CFR 268.45."

8.1 RESTRICTED WASTE TREATED TO FERFORMANCE STANDARDS

"I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operaction of the treatment process used to support this certification. Based on my inquiry of those individual immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so us to comply with the treatment standards specified in 40 CFR 268.40 without impermissible dilution of the prehibited wasts. (am aware there are significant penalties for submitting a false certification. including the possibility of fine and imprisonment.

B.2 (Certification removed by Phase IV.)

S

B.3 GOOD FAITH ANALYTICAL CERTIFICATION FOR INCINERATED ORGANICS

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification. Based on my inquiry of those individuals immediately responsible for obtaining this information, I believe that the nonwastewater organic constituents have been treated by combustion in units as specified in 268.42 Table 1. I have been unable to detect the nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the penaltility of fine and imprisonment.

B.4 DECHARACTERIZED WASTE REQUIRES TREATMENT FOR UNDERLYING MAZARDOUS CONSTITUENTS *I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hattardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a

folse certification, including the possibility of fine and imprisonment."
RESTRICTED WASTE SUBJECT TO A VARIANCE

This waste is subject to a national copacity variance, a treatability variance, or a case-by-case extension. Enter the effective date of prohibition in column 5 above.

•	For Hazardous Debris: "This hazardous debris is subject to the alternative treatment standards of 40 CPR Part 268.45." RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT "I certify under penalty of law I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards opecified in 40 CPR Part 268 Subpart D. I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment." WASTE IS NOT CURRENTLY SUBJECT TO PART 268 RESTRICTIONS This waste is a newly identified waste that is not currently subject to any 40 CFR Part 268 restrictions.
2	mereby certify that all information submitted in this and all associated documents is complete and accurate, to the set of my knowledge and information. Title 1990 Chemical Hadto Management, Inc 08/95- Form CMM-2005-C

SOLVENT

If the waste identified on the first page of this form is described by any of the following USEPA hazardous waste codes: FOOL, FOOL,

STATE OF THE PROPERTY OF THE PERSON OF THE P

NAZATOONS CONSCIENCES MASE AISC	SOLVENT WASTE TREATMEN	T STANDARDS	
F001 through F005 spent act- vent constituents and their associated USEPA hazardous waste code(s).	Treatment Standard Wastewaters Nonwastewaters	F001 through F005 spent solvent constituents and their associated USEPA nazardous	Treatment Standard Wastewaters Nonwastewaters

All spent colvent treatment standards are measured through a total waste analysis (TCA), unless otherwise noted. Wastewater units are mg/l. nonwastewater are mg/kg.

For contaminated soils using the alternative soil treatment standards, the treatment standards for F001-F005 spent solvents must be a 90% reduction of constituents or loss than 10 x the standards listed.
